STATEMENT BY FIRM Mohr & Seredin, Landscape Architects, Inc. is a professional consulting firm founded in 1989 that provides land planning and landscape architectural services to clients throughout New England. Our services include landscape design, visual resource analysis, planning, urban design and garden design. The principals, Stephen Mohr and Tatyanna Seredin, have more than 50 years of experience in all facets of landscape architecture, and bring this expertise to bear on every project undertaken by the firm. A technical and administrative staff of 5 to 7 is maintained in order to keep the firm responsive, efficient, and manageable. Mohr & Seredin approach each project with the recognition that every client, and each project, is an important commission for the firm. A principal at Mohr & Seredin works with the client for the duration of the project, and each project is reviewed by both of the principals at key stages of the development of the work. The principals are experienced in working with the Maine landscape and regulatory environment. Mohr & Seredin prides itself on being responsive, timely, and attentive to each client's needs as well as to the project's program and budget. The principals have been practicing in New England since 1978, and are familiar with the planning, design and regulatory issues which pertain to projects in Maine. Stephen and Tanya are both registered landscape architects in Maine. The firm is a member of the National Alliance for Olmsted Parks and is a founding trustee of the Maine Olmsted Alliance for Parks and Landscapes.
